    participant ATM View Controller
    Operator->>ATM View Controller: Move Operator Switch from Off to On
```

The diagram is a UML sequence diagram. At the top, there are four lifelines represented by rounded rectangles: 'Operator', 'Customer', 'ATM View', and 'ATM View Controller'. Below the 'Operator' lifeline, there is a vertical rectangular activation bar. A horizontal message arrow originates from this bar and points to the 'ATM View Controller' lifeline. The message is enclosed in a rectangular box with brackets at the ends, containing the text 'Move Operator Switch from Off to On'. The 'ATM View Controller' lifeline also has a vertical rectangular activation bar at the point of receipt.
